Continuation of Substance of Interview including description of the general nature of what was discussed: The amendment to claim 1 was proposed by the Examiner. The examiner proposed changing "a functional member attachment portion" to --at least one functional member attachment portion--. This amendment was proposed to help clarify claim 11 (which claims additional recesses and protrusions which act as additional functional member attachment portions). The Examiner also proposed adding --an inner wall of-- before "the door trim" in the last 2 lines of the claim. This amendment was proposed to clarify that the protrusion of the door trim was along the inner wall (facing the interior of the cavity of the door trim structure). Mr. Ward had to discuss the amendments with the Applicants. In a telephone conversation on June 24, 2004, the proposed amendments were approved. In addition, claims 12 and 13 were amended to change "functional member attachment portion" to --at least one functional member attachment portion-- (to make them consistent with claim 1). .
